

# GENETIC CERTIFICATE

**Mrs Linda VERBEEK**  
Schoolbergenstraat 107

3010 Kessel-lo  
Belgium

Name : **Blueberry Rebels Louisiana**

Breed : **American Staffordshire Terrier**

Identification Nu : **967 000 009 507 273**  
Pedigree Nu : **LOST / 1119474**

Sex : **Female**  
Date of birth : **01/09/12**

Sampler : **Veterinarian**  
**Dr Pascal VAN AERSCHOT**  
(Sint Joris Weert, 3051, Belgium)  
Sampler nu. : **2103**

Sampling date : 02/09/13  
Sampling type : Cheek swab  
Sample Nu : **414153**

Receipt date : 09/09/13  
Case : 83044 / 43656 / 201307633 - 09/09/13  
Reference : 18522 / 10432 / 94524  
Test : 130841/89517  
Result code : 102674

## Cerebellar Ataxia

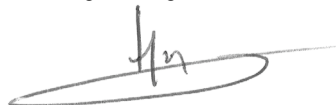

Result : **Normal homozygous**

Tested disease : **Cerebellar Ataxia**

Interpretation : The animal has 2 normal copies of the gene implied in the Amstaff cerebellar ataxia. The animal will not develop the cerebellar ataxia. The animal will not transmit the genetic anomaly to its progeny.

Result date : 12/09/13

Lina MUSELET  
Engineer in genetics

### Explanations :

This test is specific to the cerebellar ataxia in American Staffordshire Terrier (Amstaff), also named cerebellar cortical degeneration or neuronal ceroid lipofuscinosis (NCL). This neurological disorder is inherited as an autosomal recessive trait. This test relies on the detection of the normal form of the gene implied in the Amstaff cerebellar ataxia and the only defective form known up to date. The technology underlying this test is patented world-wide by INRA and ENVA. ANTAGENE has a exclusive international license to provide this test. This one can not be used to detect other forms of ataxia, nor other forms of inherited neurological diseases, nor other neurological ailments acquired during the life span of the animal.

The laboratory ANTAGENE puts at its disposal all resources and means necessary with regards to reliability, quality assurance, and traceability in order to guarantee a result of 99% accuracy.
